Re: Way Broadcasting License, LLP
KLJB (AM), Roseville, California
Facility Identification Number: 57702
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed August 20, 2007, on behalf of Way Broadcasting License, LLP ("WBL"). WBL requests extension of the special temporary authority ("STA") granted on February 20, 2007, to operate Station KLJB with a temporary nondirectional antenna.¹ In support of the request, WBL states that Station KLJB is paired with AM Expanded Band Station KESG and, with the end of the five year period following licensing of the Expanded Band station, it discontinued operation of Station KLJB and removed the directional phasing equipment. WBL states that it has ordered the design and delivery of new phasing equipment but that the project has taken more time than expected, and requests extension of STA for operation of Station KLJB with a nondirectional antenna and reduced power pending restoration of the licensed directional antenna system.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due

¹ KLJB is licensed for operation on 1110 kHz with 5 kilowatts daytime and 0.5 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KLJB may continue to operate with a temporary nondirectional antenna and reduced power not to exceed 1.25 kilowatts daytime and 0.125 kilowatt nighttime. It will be necessary to further reduce power or cease operation if complaints of interference are received. WBL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. The authority granted herein is without prejudice as to the Commission's final action with regard to the recently-filed pleadings in the AM Expanded Band proceeding². Any construction undertaken pursuant to this authority is entirely at WBL's own risk.

This authority expires on **July 30, 2008**.

Sincerely,

A handwritten signature in dark ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.
